Graduate student pursuing a Master of Science in Civic Analytics with experience in program support, operational data analysis, research, and performance reporting across public-sector and nonprofit organizations. Familiarity with Excel, PowerBI, and R, with experience translating complex data into actionable recommendations, supporting organizational decision making, and communicating findings to stakeholders. Interested in applying analytical and organizational skills to energy efficiency program operations and delivery.

EDUCATION

University of Illinois Chicago (UIC), Chicago, IL

Master of Science in Civic Analytics May 2027

GPA: 4.0

- Related Coursework: Data Management & Analysis I & II, AI & Machine Learning, Foundations of Public Service

Bachelor of Arts in Sociology, Minor in Communications August 2024

GPA: 3.7 | Magna Cum Laude

- Related Coursework: Research Methods, Sociological Statistics, Communication and Culture

RELEVANT EXPERIENCE

Safety Data Analyst Intern, Chicago Transit Authority May 2026 – Present

- Analyzed operational safety data to identify recurring trends, assess performance patterns, and support evidence-based recommendations
- Cleaned, validated, and maintained operational datasets using Excel and R to support accurate reporting and year-over-year performance analysis
- Developed Power BI dashboards and visual reports to monitor safety trends, recurring inspection issues, and operational performance indicators
- Presented analytical findings and recommendations to CTA leadership and developed guidance materials to support operational communication across bus facilities

Development Intern, Illinois Workers in Action, Chicago, IL July 2025 – January 2026

- Conducted outbound calls to prospective program participants to communicate available services and support community outreach efforts
- Maintained Excel databases to track outreach activities, engagement metrics, and organizational performance
- Validated and organized program-related data to support consistent reporting and documentation
- Analyzed outreach and performance trends to inform organizational planning and resource allocation decisions

Development Intern, Human Rights First, New York, NY May 2024 – August 2024

- Compiled and maintained donor-related datasets to support funding analysis and strategic planning
- Structured and validated revenue data to ensure accuracy across reporting cycles
- Developed concise data summaries and visual materials to communicate fundraising trends
- Collaborated with development staff to translate data insights into donor-facing planning materials

Capstone Project Intern, Obama Foundation, Chicago, IL January 2024 – May 2024

- Conducted research on emerging industries, including AI and cannabis, to assess social and economic impacts and inform organizational decision making
- Evaluated existing data collection and vetting processes, identifying opportunities to improve workflow efficiency and consistency
- Organized and analyzed research findings to support impact assessments and strategic recommendations
- Presented research findings and recommendations through visualizations and written summaries

PROJECTS

CTA Transit Access Analysis, UIC, 2026

- Analyzed the geographic distribution of public transit services across Chicago communities to evaluate disparities in transportation accessibility
- Integrated CTA transit location data with Census demographics using R and geospatial analysis to examine differences in service distribution
- Created maps and statistical visualizations to identify differences in transit accessibility by neighborhood racial composition

Police Presence and Crime: District-Level Data Analysis, UIC, 2025

- Collected, merged, and standardized public datasets to examine relationships between police staffing and reported crime across Chicago districts
- Conducted statistical and descriptive analyses to identify patterns in resource distribution and operational outcomes
- Developed data visualizations and written reports to communicate research findings and support evidence-based discussion

Healthcare Access & Geographic Disparity Analysis, UIC, 2024

- Identified healthcare providers meeting defined criteria and compiled address-level data from public sources
- Validated and structured location data into a usable dataset for geographic analysis
- Assessed distribution disparities across Chicago neighborhoods and documented findings through visual mapping and summary analysis

OTHER PROFESSIONAL EXPERIENCE

Server, Pasta Bowl, Chicago, IL May 2024 – Present

Sales Associate, Glossier, Chicago, IL March 2023 – June 2024

- Tracked KPIs and performance trends to inform merchandising and customer engagement strategies

Barista, Starbucks, Chicago, IL September 2018 – March 2023

SKILLS

Program & Research

Program Support, Research, Performance Reporting, Process Improvement, Documentation, Data Collection
